SANİCA CLEAR SHILD

Suyun cam yüzeyinde kalması zamanla cam yüzeyinde kireçlenmeye ve ma,00aşmaya neden olur. Sanica Clear Glass uygulaması cam yüzeyinde suyun damlacıklar halinde kaymasını sağlayarak kir ve kireç oluşumunun önüne geçer. Sanica Clear Glass uygulaması her kullanım sonrasında çekçek yardımıyla yüzey temizliğinin yapılması durumunda özelliğini uzun süre korur.

As long as water remain on glass, calcification occur on the surface of the glass and loose its transparency having dully surface. Sanica Clear Glass application creates a chemical layer on the glass surface. This layer allow water drops to ski away and prevents the dirt and scale formation. Sanica Clear Glass, application Using a squeegee to clean the glass after each use protects the property for a long time.

Kurulum yerinden kaynaklı kumlama desenlerde milimetrik kaymalar olabilir.
After installation, the Dimension cms of sandblast pattern may have a negligibl pinpoint shifts.
